OUR VISION

Preface

About 10,000 years ago, the earth had 6.2 billion hectares of forests covering nearly half of the land, but now there are only more than 2 billion hectares left. The global tropical rain forest is decreasing at the rate of 17 million hectares (42 million acre) per year, which means we will lose forests equivalent to a tropical size of a football field every minute.

The global paper production and consumption has reached 320 million tons every year. If four trees with an average age of 20 years need to be cut down per ton of paper as raw materials, nearly 1.3 billion such trees will disappear from the earth in one year.

In history, forests once covered 2 / 3 of the earth's land area. After entering the 20th century, the rate of forest reduction has further accelerated. If this development continues, the world's tropical forest resources may be destroyed in a few years. We should pay attention to the impact of deforestation on the environment includes climate change, landslides and floods, as well as the most important biodiversity and habitat reduction.

Is reforestation useful? In fact, rebuilt forests and secondary forests can never completely replace the multi-layer trees and millions of organisms in the original rainforest, some of which have only been discovered now.

Our vision

Today, a large number of trees are still cut down for wooden fences every year. And we are sad to find that every 3 to 5 years, these wooden fences will be abandoned due to the nondurable, and more trees will be cut down for new wooden fences, round and round.

Showtech Fence brand founder Xijun Xiang started Tree Protection Project since 2006. We joined the PVC fence manufacturing industry to prevent more tree be felling for wooden fences. And We will put 20% of our annual profit in afforestation. This project has been going on for 15 years, and by now we have planted more than 100,000 trees. In Northwest China, it was originally a desert area. Due to the 15 years of afforestation plan, we can see lush trees and clear rivers now.

Showtech PVC products are harmless to the environment from raw materials to recycling.

PVC resin - The core material in vinyl products. We use calcium carbide synthesis technology to extract PVC resin. Compared with petroleum ethylene synthesis technology, our method does not consume oil resources, this process is pollution-free.

Manufacture - The production process of PVC products does not come into being any harmful substances. We heat and melt the raw materials to get the final products by injection and extrusion technology. Some leftover materials will be re-broken into raw materials for production. We use recycled water to cool down the whole system, that will not cause the consumption of water resources.

PVC products - We only use 100% virgin material to produce high quality products with UV resistance and lifetime warranty, which means our products do not blister, peel, corrode, rot or weathering. With time goes by, our products keep durable and do not decompose into the soil. In the same life cycle, wooden fences have to replace parts frequently. This is the most significant thing we do to prevent trees from being cut down.

Maintenance - In order to prevent insects from corroding wood, wooden fences need to paint the surface intermittently, similarly to metal fences prevent rust. The formaldehyde in paint does great harm to the environment and human body. Showtech high quality products no need to painted surface. Regular maintenance just water cleaning.

Recycling - If Showtech PVC fences need to be taken down, they can be recycled into other plastic products, such as hotel access card, or be used for thermal power generation, which has achieved the purpose of resource recovery.

We call on more people to join the PVC fence industry, and will spare no effort to provide all the help we can do. Let us contribute to the protection of the earth, for our better future.

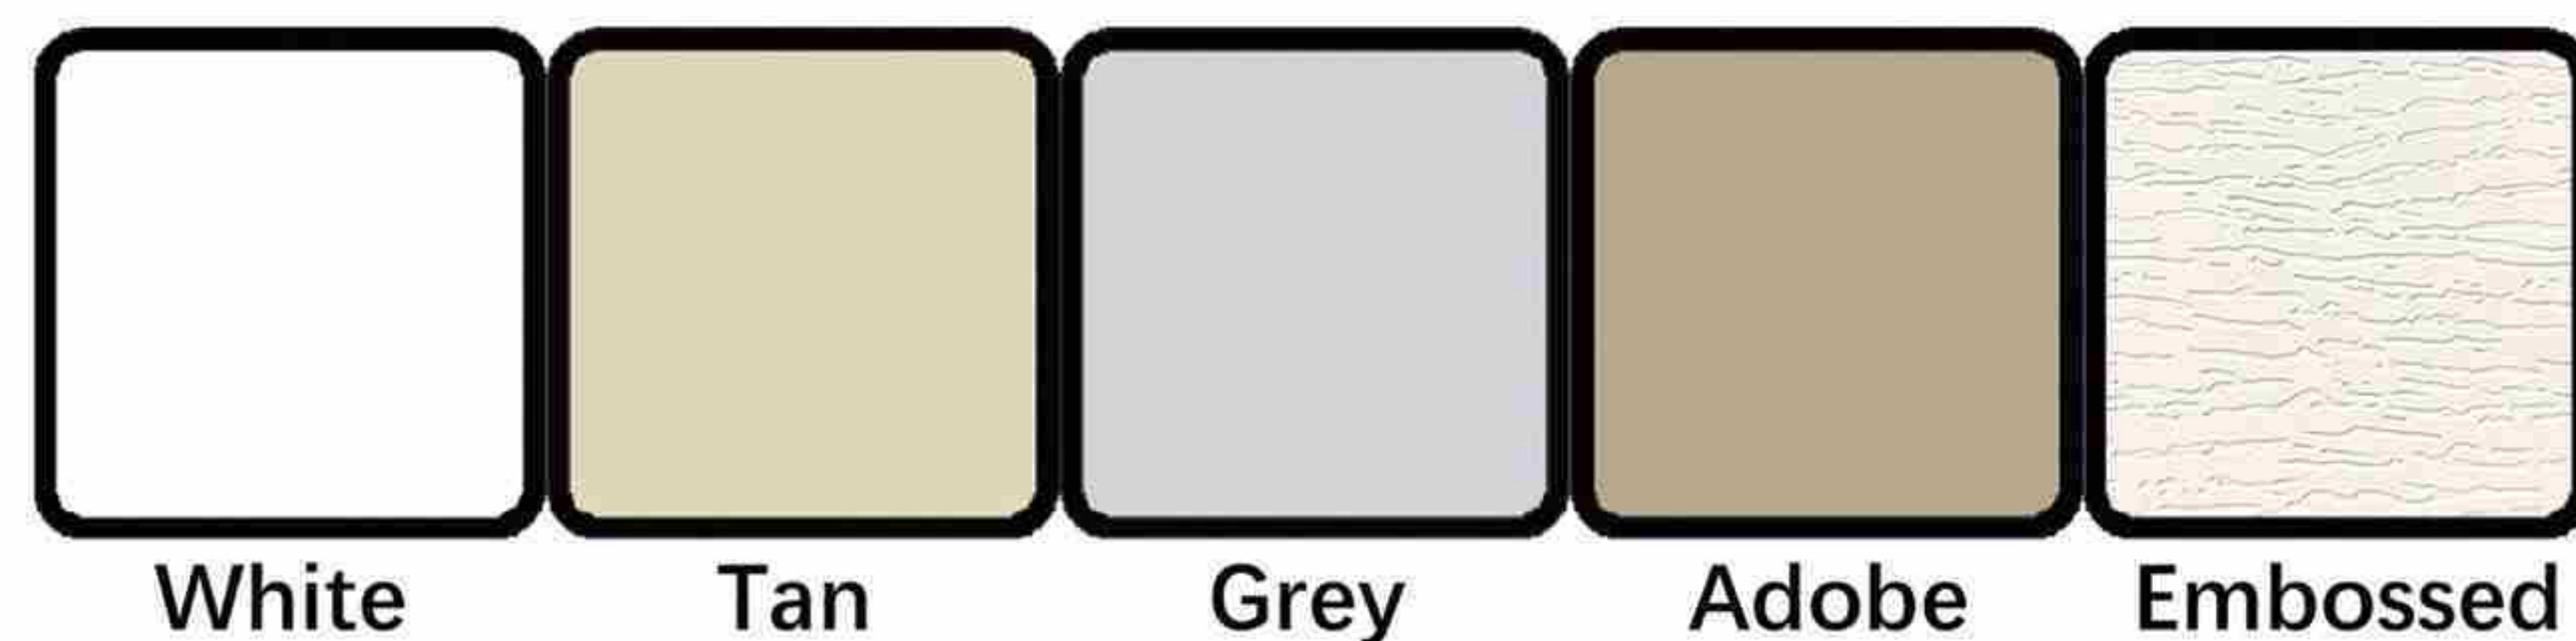

About us

We are a professional PVC fence manufacturer from China, owning the brands Showtech Outdoor Products & Gohigh Plastic since 2005. The brands founder Xiujun Xiang has been committed to promoting the development of China's PVC fence industry over 15 years. We focus on providing great customer service and supplying high quality PVC products to the world.

Our main products are PVC profiles, different PVC fence styles for home and farm, fence accessories such as caps and hardware, PVC decking and PVC garden products kits.

We took our passion, creating innovative, quality products that make you beautiful home. We fence your dreams.

COLORS & TEXTURES AVAILABLE

OUR ADVANTAGES

GREAT CUSTOMER SERVICE IS THE CORE OF OUR BUSINESS.

1

HIGH STANDARD PRODUCTS

- ✓Only use 100% virgin material to produce high quality products, meet ASTM F964 and D1748 specification.
- ✓Add in 10 parts titanium dioxide (TiO₂), making PVC products UV resistance.
- ✓SGS, ISO9001 certifications.
- ✓Lifetime limited warranty. Showtech PVC products never fading, blister, peel, corrode or rot.

2

LONG TERM STEADY SUPPLY

- ✓Manufacturing and exporting PVC products over 15 years, supply to more than 30 countries.
- ✓Annual output of PVC profiles amounts to 8000 tons.
- ✓Complete supply of accessories, one-stop service.
- ✓Deep cooperation with shipping companies, fast and on time delivery.

3

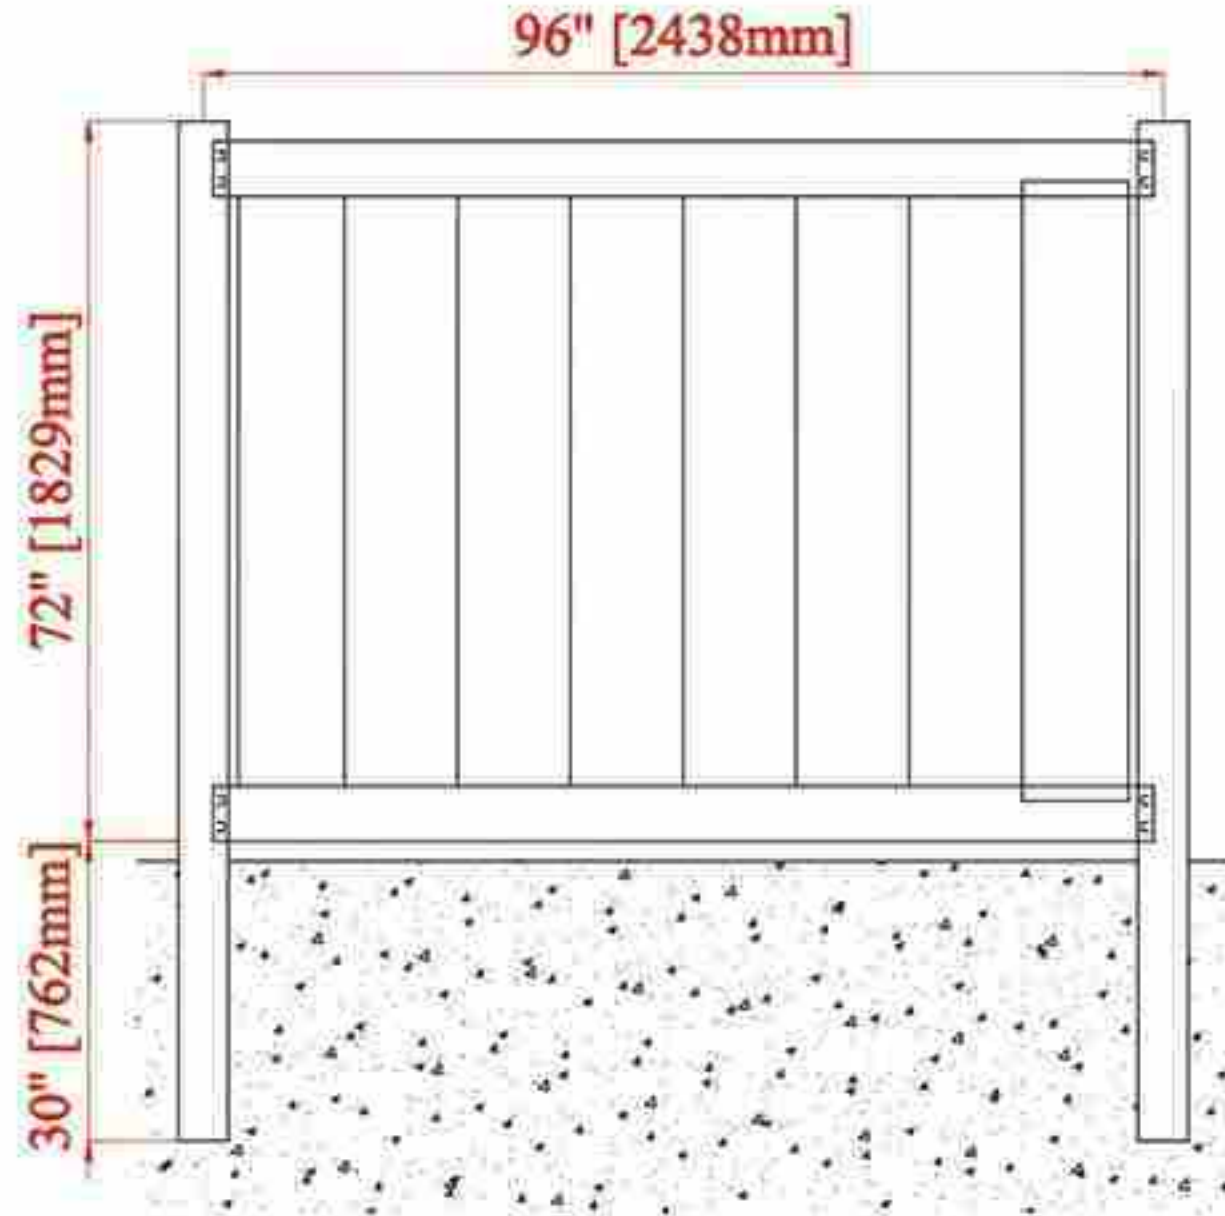

DESIGN, RESEARCH AND DEVELOPMENT

- ✓Continuously launch new products to hit the market.
- ✓With strong ability to build new molds independently.
- ✓Provide various personalized customized services.
- ✓ODM, OEM services are available. Professional suggestions.
